# ABOUT US

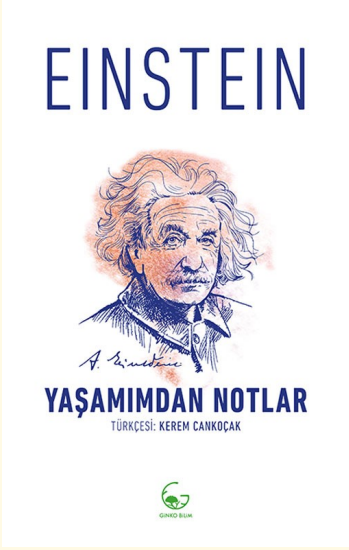

*Ginko Science* is an imprint of *Ginko Books* operating in Turkey since 2017. It is mainly interested in publishing masterpiece works of prominent scientists on natural sciences. *Ginko Science* has two sister imprints, *Kor Books* and *Ginko Kids*, focusing on world and children literature, respectively.

## **Why we exist...**

Science in the 21st century pushes ahead at an unprecedented pace. In accordance with this, scientists are undertaking new initiatives in relation to the implications of their works. In the second edition of his *The Two Cultures* in 1963, C.P. Snow had introduced a new article in which he hoped that *The Third Culture* would come to exist. For Snow, the third culture would fill the gap between the two cultures, and literary and scientific intellectuals would be able to talk to each other. However, contrary to Snow's expectance, the difference in terms of culture and understanding between them remains today.

The aim of *Ginko Science* is to express the recent and deepest thoughts in a way that the curious readers could reach out, removing the intermediary between science and the people in line with the *third culture ecole*. At present times, we don't have the luxury of being unaware of chaos theory, physics, molecular biology, artificial intelligence, artificial life, neural networks, big bang, superstrings, biodiversity, nanotechnology, human genome, haphazard evolution, fuzzy logic, Gaia hypothesis, virtual reality, etc.. These are issues that will affect everyone's life on the planet.

## - RELEASED BOOKS -

### *Autobiographical Notes*

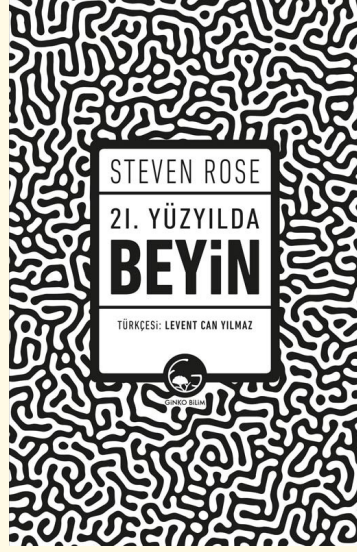

**Author:** Albert Einstein

**Translator:** Kerem Cankocak

**Language:** Turkish

**Paperback:** 64 pages

**ISBN:** 978-6056732232
